# Call Centre Solution

· Our call center solutions help you deliver exceptional customer service with maximized agent efficiency at budget-friendly costs.
· They provide all the essential call centre features including best-in-class automatic routing, call management, agent management tools, and real-time wallboards, analytics & reports.
· Seamlessly integrates with CRMs, workforce management and VoIP PBX systems to put everything you need in a single unified communications system, enhancing your customer service, improving agents efficiency and boost to your business.
· With remote office features, you can also easily manage call centre agents working remotely from home or out-of-office ensuring quality customer service at all times.

## Cloud PBX Solution

· Our Cloud VoIP Service is a feature-rich and adaptable solution that combines cloud (Internet) technology services with advanced Unified Communication capabilities offering affordable hosted VoIP solutions at low up-front hardware costs.
· It saves on equipment and maintenance costs because no physical system is bought or installed. All you need is a PC, tablet or phone/softphone and you are ready to go.
· Our platform offers multi-level security, monitoring and reporting capabilities as standard with a complete Hot Standby solution which provides our customers high system availability and help prevent unnecessary business loss Phones.

## VOIP PBX System

· We offer VoIP PBX Systems that deliver more than telephony; they are a complete unified communications solution with enterprise-grade business communication services for users across a wide variety of industries.
· These systems are scalable, easy to use and manage, secure, and use the latest VoIP technologies to offer future-proof yet cost-effective communication solutions.
· Seamlessly work with remote/out-of-office staff by transforming your desktop/laptop and mobile phone into a fully featured office extension with easy collaboration to platforms like Microsoft teams, Zoom, Skype, Contact Management Systems and CRM integration with click-to-call features.
· We also supply other VoIP equipment and systems including Analog/GSM/ISDN Gateways, Video & Audio Conferencing Systems, and IP Phones.

# Business Communication Solution

***To make the adoption, integration and use of business communication technologies Simple, Easy and Relevant for everyday operations.***

## • Simple

Deliver intuitive business communication solutions that eliminate complexity and make it easy for organizations to adopt and integrate technologies for greater efficiency.

## • Easy

Empower organizations with userfriendly solutions that overcome technology adoption challenges and make new technologies accessible even to non-techsavvy users.

## • Relevant

Provide customized, cost-effective, and scalable solutions that leverage existing technologies to meet clients' unique communication needs.

## Grow Your Business Communications

VoIP Systems is the next generation with over the years' experience in the industry, we are committed to delivering quality Voice over IP (VoIP) office phone solutions. We are always up to date with the latest in telecommunications technology so we can tailor design the best and most cost-effective solution for you and your business.

We pride ourselves on services and selling quality products and services

# Commitment

***To meet all the needs of modern-day businesses by constantly adapting our solutions and services in an ever-changing business environment.***

Through continued investment in our team, infrastructure,product research, and development, we focus on delivering customer-centric value and experience with a combination of process excellence, quality frameworks, and innovative service delivery.

# Purchase Options

## Rent/Lease

Rent/Lease (Pay-to-own) an entire business communication solution including Voice and Data Networking Systems. This option allows you to implement the best communication solution for your business at full capacity without having to worry about the expense of outright purchase and cost of maintenance.

## Outright Purchase

Purchase your equipment from us and we will install your communication solution at your premises.
The system will be integrated into your data network (LAN) and is not dependent on the quality of your Internet connection. We provide after-sales technical support to ensure customer
